

WOMT Decision 6/5/2007

- The USBR will continue to work with the FWS, DFG and NOAA Fisheries to find willing sellers in an attempt to maintain existing flows on the San Joaquin River.
- USBR will cycle the opening and closing of the Delta Cross Channel (usually opening on weekends and closing on weekdays) and continue to monitor the situation and revisit DCC operations weekly, based on 1) advice from the DSWG that closing the DCC would likely have only a minimal benefit to delta smelt, and 2) adverse impacts to emigrating Sacramento Basin salmonids, and 3) potential violation of water quality standards/objectives.
